## CAREER OBJECTIVE

A disciplined and hardworking individual is eager to serve the Organization or Institution with which I associates at any point of time with best of my knowledge and to keep on learning new concepts from which I can deliver my best work.

## PROJECTS

### ➤ **Pet Store:-**

Built a pet shopping application using Python with the Django framework, HTML/CSS for frontend design, JavaScript (jQuery) for interactivity and Git for version control

### ➤ **The Fitness Arena:-**

The above fitness app was developed using AngularJS for the front-end, integrated with Node.js and Express for the backend services, MongoDB for data storage.

### ➤ **Library-Management-system:-**

Library Management System is developed using HTML, CSS, JS as front end and PHP, MySQL as back end.

### ➤ **Footprinting with NMAP:-**

Footprinting is the first phase of ethical hacking, which involves gathering information about a target system or network to identify potential vulnerabilities and weaknesses. NMAP (Network Mapper) is a popular open-source tool used for network discovery and security auditing.

### ➤ **Side Projects:-**

- ◆ E-commerce application using WordPress
